Granulated Soap

Ingredients

- 3 qts. cold water
- 1 can lye (12 oz)
- 3/4 cup borax
- 4 lbs. melted grease

Instructions

1. Into cold water, empty lye. Add borax and stir until all is dissolved.
2. Into this lye solution, pour the melted (not hot) grease, stirring constantly for 10 to 15 minutes.
3. Stir occasionally for the next 36 hours. The more it is stirred, the more granulated it becomes.

Granulated Soap

3 qts. cold water — 1 can lye
3/4 C. borax — 4 lbs. melted grease.

Into cold water empty lye, add borax & stir until all is dissolved. Into this lye solution, pour the melted (not hot) grease, stirring constantly for 10 to 15 minutes. Stir occasionally for next 36 hours. The more its stirred, the more granulated it becomes.
